

Clinical Investigator Faculty Positions
Duke Nephrology-Duke Clinical Research Institute

The Division of Nephrology, Department of Medicine at the Duke University School of Medicine and the Duke Clinical Research Institute (DCRI) are partnering to recruit board-certified nephrologists at the Assistant, Associate or Professor levels to grow our joint clinical research program. We seek committed clinical investigators, who are team players eager to split their professional effort between clinical nephrology and clinical research leadership and mentorship. We define clinical research broadly to include epidemiology, outcomes research, population health, patient-oriented research, and all aspects of interventional studies, including all phases of clinical trials, pragmatic trials, and data coordinating center management. Ideal applicants will have strong clinical skills, a track record of original research scholarship, and passion for conducting cutting-edge multisite human research. Successful candidates will grow their externally funded research program at Duke while providing vision and strategic direction for clinical research activities within the Division and in nephrology research at the DCRI. All Duke faculty are expected to contribute to our educational mission, including supervision and teaching of Duke students, residents and fellows in the course of clinical attending. There will be ample opportunities for research mentorship of trainees at all stages.

This is a unique opportunity to play a leadership role in growing a cutting-edge clinical research organization within a premier academic environment with significant research resources.

Duke University is located in the heart of North Carolina's research triangle, which offers a wide variety of housing options, excellent schools and a broad range of recreational and cultural activities in a temperate climate with convenient access to an international airport.

Interested candidates should send their CV, a short cover letter with a statement of intent to the Nephrology-DCRI Search Committee, care of Karina Sotomayor (karina.sotomayor@duke.edu). For inquiries about the position, please contact Mo Querey (maureen.querey@duke.edu).
