E.13 ATTESTATION for faculty and staff involved in research (either externally supported or internally).

Note that the definition of research misconduct involves the fabrication of research data (experimental results have been made up by the researcher) or falsification of research data (experimental results have been altered by the researcher) or plagiarism (the researcher takes someone else's research findings or written materials and claims them as their own). I certify that during the past year I can attest to one of these two options:

- I have not observed any instances of misconduct in research.
- I have reported any observed or suspected instances of research misconduct to an institutional official or to the Research Integrity Hotline. Institutional officials include Chairs, Institute Directors, Division Chiefs, the appropriate Misconduct Review Officer (i.e., SOM for SOM/SON faculty and staff), the Compliance Office or the Dean's Office.
