

DCRI SITE COMMUNITY

The depth and breadth of DCRI's collaborations reach around the globe to **more than 40 countries**. In the U.S. alone, the DCRI network **touches every state with more than 1,520 sites**.

RESOURCES

The DCRI team is adept at working closely with the local site teams to provide guidance and tools that result in the successful start-up and implementation of trials. They will work closely with you on the following key aspects of a study:

- Regulatory Documents
- Site Training & Investigator Obligations
- Site Contracts & Budgets
- Recruitment & Retention
- Data Completeness & Currency
- Quality & Compliance

Collaborating to Improve Care

You're in Good Company

As the world's largest academic research organization, the DCRI is committed to engaging you in compelling research that will help improve the health of people around the world.

**Based on a recent survey,
our clinical sites are:**

EXPERIENCED

averaging

12+ years

of clinical-research
experience

ACTIVE

averaging

15+ trials

at any time

VALUED

89% of respondents

feel valued as a

DCRI research partner

A FOCUS ON THE PATIENT

Now more than ever, patients are at the center of the work we do. Together, we're guiding groundbreaking studies on behalf of industry-leading sponsors and organizations such as the NIH and the Patient-Centered Outcomes Research Institute (PCORI). Through the DCRI Research Together™ program, we are transforming clinical research by engaging patients, care providers, and health systems in collaborative partnerships that leverage health data to advance medical knowledge and improve health care.

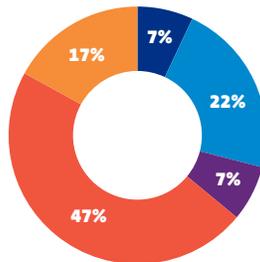

Our goal is to support those who are on the front line of research: local sites and patients. Our site community brings an eagerness to learn from peers, enthusiastic curiosity, and rigor to every aspect of every study.

“The best research comes from a team approach where the voices of patients, coordinators, investigators, and colleagues are equally heard. This approach is the model for site engagement at the DCRI.”

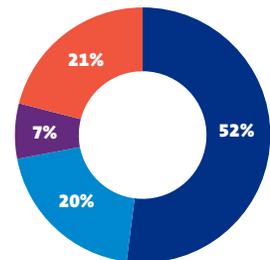

*Renee Leverty, BSN, MA
Program Lead, DCRI Research Together™*
