A mission-driven organization, the DCRI is developing and sharing knowledge that improves health around the world through innovative clinical research. As part of this mission, Data Analyses & Publications combines the thought leadership of its clinical and statistical faculty with its biostatistics and publications management expertise.

### NUMBERS THAT MATTER (1996–2020)

- **16,000+** publications in peer-reviewed journals
- **2,900+** publications in top-tier journals
- **760,000+** scientific articles have cited our findings
- **1,130+** collaborating authors
- **690+** institutions represented by coauthorship
- **50+** countries represented by coauthorship

### CLINICAL THOUGHT LEADERSHIP

- Practicing Duke clinicians leading innovations in research
- Demonstrated success in partnering with a global network of academic collaborators

### BIOSTATISTICS

- Statistical experts who ask the right questions to define the appropriate analyses
- Tailored methods using best-in-class tools and mathematical algorithms

### PUBLICATIONS MANAGEMENT

- Publications experts collaborate with publications committees, principal investigators, authors, and sponsors to manage review and submission process to meet objectives and timelines
- Experienced in developing strategic publications plans to target appropriate meetings and journals and ensure prompt dissemination

### MEDICAL EDITORS

- Skilled medical editors knowledgeable about current ICMJE recommendations and GPP3 guidelines
- Editorial support for manuscripts, abstracts, and poster and slide presentations

---

### You need:

- Quality, impact, and credibility
- Clinical interpretation for health care providers
- Accurate interpretation and presentation of data
- Efficient publications planning to ensure prompt dissemination

### We offer:

- Renowned academic and clinical thought leadership
- Clinical, disease-specific faculty who participate in the planning and presentation of the science
- Statistical expertise
- Experienced medical editors and publications project managers who support and manage the publications process
- Skilled medical editors
DCRI DATA ANALYSES & PUBLICATIONS

OUR TRACK RECORD

Kevin Anstrom, PhD
Director, DCRI Biostatistics

G. Michael Felker, MD, MHS
Director, DCRI Cardiovascular Research, Professor of Medicine, Cardiology

Lisa Wruck, PhD
Director, Center for Predictive Medicine

Elizabeth Cook
Manager, Medical Communications & Scientific Publications
