The DCRI Imaging Program is at the forefront of imaging clinical research, with Duke Imaging and Radiology faculty and staff authoring national standards for clinical care and research. The program is one of the most respected imaging clinical trials groups in the world, providing experienced oversight and independent imaging management for all phases of clinical trials, including multicenter industry trials.

**DCRI IMAGING OFFERINGS**

**Thought leadership**
- Trial design
- Imaging design
- State-of-the-art imaging techniques
- Results interpretation and dissemination

**Regulatory and policy expertise**
- FDA panels and committees
- Submission experience
- National guidelines authorship

**Efficient and knowledgeable operations**
- Project management
- Trial setup
- Site image acquisition and analysis
- Reproducibility testing and remediation
- Data quality assurance
- Compliant with good clinical practice guidelines

**Image-management solutions**
- Web-based image transfer linked to EDC
- Web-based PACs system for site and sponsor review
- Secure, cloud-based image storage
- State-of-the-art analysis systems

**IMAGING EXPERIENCE IN CLINICAL TRIALS AND RESEARCH**

- **EKG**
  - Subjects: 52,589
  - Studies Interpreted: 56,672

- **Angio**
  - Subjects: 1,049
  - Studies Interpreted: 1,670

- **Stress Echo**
  - Subjects: 2,659
  - Studies Interpreted: 2,709

- **Echo**
  - Subjects: 22,052
  - Studies Interpreted: 37,885

- **Cardiac CT**
  - Subjects: 2,441
  - Studies Interpreted: 2,441

- **X-ray**
  - Subjects: 2,457
  - Studies Interpreted: 2,457
